### Southern Notes.

During the late freshet the Chattahoochee river rose forty feet.

A Jacksonville man has invented a cham pagne wine made from the orange.

Seven hundred and eighty officers are to be elected by the people of Alabama next The bridge at St. Louis will be open to foot passengers and street cars May 1, and for railroad trains July 1.

Colonel George L. Peyton has contracted for the Greebrier White Sulphur Springs, and a big season is anticipated.

Bowles, a Mississippi negro, is said to hanker after social equality disturbances. He goes around on steamboats asking for bridal chambers, and things which he knows he cau't get, and then presecutes the captains for not giving them to him.

The Eufaula News has an account of horrible affair which occurred in Barbour county, between Eufaula and Greenville, on county, between Eufaula and Greenville, on Thursday morning last. A negro boy, seventeen years of age, named Nathan Newton, had married the daughter of a negro named Daniel Brooks. He proposed to move his wife to his own residence, to which B. objected, and persuaded the girl not to go. Nathan went back on Wednesday last to see if he could not persuade his wife to go with him, and Brooks set his dogs on him. Nathan fied, and the dogs followed him home. That night Brooks and two other negroes, armed, arrived at Mr. Alston's, where Nathan was living, accused him of stealing the dogs, and living, accused him of stealing the dogs, and lorced him to accompany them to Brooke's, where they whipped him to death with a buggy trace! They then fled, and have not yet been arrested.

The Opelika Times says: The Savannah and Memphis Railroad will not run to Birmingham, as heretofore expected. The surveys have been changed, and Birmingham will be left high and dry, twenty miles to the right. The road will pass through Calera, and directly on to Corinth, Mississippi saving about twenty a like according sippi, saving about twenty n iles, according to the last survey. General Alexander, the President of the road, is doing all in his power to push it along. The road is now in five miles of Alexander Cuty, and the ir n is now on the way to complete it be-yond that point. The East Alabama and Cincinnati Railroad we learn will be changed from a broad to a narrow guage railway. The iron now on the road will be taken up and exchanged for iron suitable for a narrow guage. By this exchange, enough iron will e gained to extend the road nearly twice as f.r as it now runs.

MISCELLANEOUS

THE werk originally published under the title of THE NEW AMERICAN CYCLOPEDIA was completed in 1863, since which time the wide circulation which it has attained in all pure of the United Sistes, and the signal developments which have taken place in every branch of science, literature and art, nave induced the editors and publishers to submit it to an exact and therough revisou, and to issue a new edition entitled THE AMERICAN CYCLOPEDIA.

Within the last for warm the contract of the contrac

titled The Arrican CTCLOPEDIA.
Within the last ten years the progress of diac very in every department of knowledge has made a new work of reference an imperative want.
The movement of political affairs has kept pace with the discoveries of ecience, and their fruitful application to the industrial and useful area and the convenience and refinement of social life. Great wars and consequent revolutions have occurred, involving instingal enanges of peculiar moment. The civil war of our own country, which was at its seight when the ast volume of the old work appeared has happly or our own country, which was at its esight when the sast volume of the old work appeared has happly been ended, and a new course of commercial and industrial activity has been commenced.

Large societies to our geographical knowledge have been made by the indefatiguable exporers of bittes.

Africa.

The great political revolutions of the last decade with the natural result of the laps, of time, have brought into public view a multitude of new men, whose names are in every one's month, and of whose lives every one is curious to know the particulars. Great battles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the transcient publications of the day, but which one, in now to take their palce in permanent and authentic history.

In preparing the present edition for the press it has

tions of the day, but which obgain now to take that pales in permanent and authentic history.

In preparing the present edition for the press, it has acc. rdingly been the aim of the editors to bring down the information to the latest possible dates, and to furnah an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest investio. So in the practical arts, as well as to give a succinct and original record of the progress of political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a successini termination.

None of the original stereoute plates have been used, but every page has been printed on new type, forming in fact a new cyclopeadis, with the same plan and campass of its predecesor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been suggested by loftler experience and enlarged knowledge.

The illustrations which are introduced for the first

in its composition as any occar agreement where repersence and enlarged knowledge.

The illustrations which are introduced for the first time in the present edition have been saded not for the sake of pictorial (flect, but to give greater lacidity and force to the explanations in the text. They embrace all branches of science and natural history, and depict them ast famons and remarkable features of scenery, architecture, and art as well as the various processes of meonanics and manufactures. Although intended for instruction rathe, than embelishment, no pains have been spared to insure their artistic excellence; the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable issuare of the Uy(lo, edies, and worthy of its high character.

Brigham Young Preparing for

The Prophet foresees, it is believed, the verthrow of his spiritual Kingdom if he remains where he is; and the old man prudent has concected a scheme that is intended to place in his hands all the wordly posses sions of his deluded followers. This very plan is considered in Salt Lake a confession of weakness, of approaching dissolution brought about through constant contact with Gentile knowledge and cutning. Brigham knows that Mormonism can only be perpet cated by a removal to some remote garden spot of the great continent, and he is pre paring for the coming blow.

The new scheme is called the Order of Enoch. It was in February that the saints Sparta and lamented the degeneracy of the times. The King replied: "What you say is undoubtedly true, for I remember that, when I was a boy, I heard my father say that I was a boy, I heard my grandfather."

A LIVELY LETTER.

Sr. I ouis April 4, 1871. Editors Constitution : It has been said that be no trains mutil Saturday. the people of this city were too much prejugraceful and vigorous writer, and will do diced against Chicago to appreciate anything HEAD CENTER to be seen there. But I propose to show you that this is a mistake as to one St. Louisan at least. Having occasion to spend a few days there last week, I was enabled to Conformation of Bell as see and appreciate some admirable things in that ambitious cl v.

The first things about the place that attracis a stranger are its hotels. The Grand Pacific is really a great establishment, comreachers reany a great establishment, com-paring favorably with the best hotels on the continent. But the Palmer House, which was opened about November last, is a much tiner and costlier building. I suppose the Palmer douse is as fine a hotel as there is in Palmer douse is as fine a hotel as there is in the world. It cost about \$2,300,000, including ing furniture, as I was informed by one of the managers. It would be difficult to describe the building so as to convey a correct idea of its real magnificence. All the stairways are of marble, and the walls for three feet on the first, second, third and fourth floors are also of martle, fine and white, with papels in some places of the same material, but of different color. You pay \$4 50 per day at the Palmer House, and the ame at the Grand Pacific Hotel; but the

fare is b stat the Grand Pacificor example, at one of the hotels you get heavy bread, cream for coffee that is too heavy bread, cream for coffee that is too strong with milk, and milk to drink that has been kimmed. At the other you find as good bread as cooks have ever learned to to drink that has not only never been skimmed, but has had cream poured into it. But are not these large and fine hotels all vanity? Those who build them, at least, ought to think so. The Grand Pacific is leased for twenty years as a rental commenci. g at \$5,000 per annum and ending at \$75,000. It cost—say, \$2,000,000. The nighest figure gives less than four (4) per cent. income on the investment, but when we al low for insurance, taxes and repairs, the property cannot pay two (2) per cent per annum on cos. Therefore it is nonsense

to build such a house, as an investment. The Palmer House has the best patronage and is headquarters of fashion. Arrivals there are almost one hundred perday, and a the Grand Pacific fifty. But many families oard at these two houses.

The new business houses in the burnt dis rict are, in the main, very fine. All the burnt stores have not been rebuilt yet. Many

lots are vacant and placarded 'for sale," and mong the new buildings many rooms are "for rent." The residence portions of the burnt district is very far from being rebuilt though many houses have been erected in At present there is very little building

At present there is very little building going on. More houses are being constructed here, both for business and for residences than in Chicago, and it seems to me the new energy developed by the fire has spent itself. Besides the hotels and business houses there he act of February 18th, 1783, all boats employed on internal waters or canals of any love below this city. In many districts the little, cold. wooden structures are so close together that f one burns all must go, unless an extra the exportation of distilled spirits, make imamount of water is used at once. In such a s The residence portion of St. Louis is in the second section which provides the omigrarably superior to Chicago, and the wonds shall be cancelled whenever proof comparably superior to Chicago, and the adications are that it will become more so. The business houses of Chicago are finer, were destroyed in transit. In such cases occause they are all new and modern in venerable age. Fuel is fifty per cent. higher of in Chicago than St. Louis, and when this is considered in connection with the little houses and milder winters here, the differ package. of these States of the cotton eace in comfort to the laboring classes is distant from the Mississippi considerable. There were many sensations in Chicago

while I was there. They had a Baptist min ister on trial before an ecclesiastical counci for yulgarily and looseness of conduct, at emale debaters; and, in the Chancery Court Bishop Whitehouse, of the Episcopal Church was seeking to enjoin the officers of the Reformer—Cheney's Church—from employing him as rector. The debate was progre

ing slowly on those grave questions, and the end of neither case seemed to be near.

Then the editor of the Chicago Times—one Story—had recently chatged one Dr. Johnson with murderlog bis (story) wife by malpractice, and Dr. Johnson had recorted by many the many than the story of the story ing Mrs. Story's charac er through th olumns of the Tribune. The excitement on this subject was intense. And last of all a committee of ladies had waited on the new city council which was elected by the union of all the bad elements in Chicago, and presented a petition against an ordinance to open liquor shops on Sanday. But the ladies, after presenting their memorial, see the obnoxious memorial pass by a large majority, and as they march back to the church from which hey came, they are hooted at all the way by he viest creatures on the ea th, while police flicers and orderly citizen, are barely abl committee numbered one hundred, and was

composed of the most respectable ladies in the city.

Lincoln Park, which is on the lake above north of the city, is the place where, it is said, one hundred thou-and homeless people ssembled to escape the flames that consumed heir houses. This is an uninclosed tract of land of, say, three hundred acres, a good por tion of it an old cemetery. The city au-thorities are irreverently digging up thbones of the people that have been buried there for many years, and removing them where they will occupy less valuable space. The graves are then to be filled up, and fine must have a park, and these graves are in t ST LOUIS

GRIFFIN.

A sensation was caused in the neighbor tine 45,000 sold tickets used.

MISCELLANEOUS. STOP, READ, REPLECT AND ACT,

**BEFORE IT IS TOO LATE!** DR. S. B. COLLINS Painless Opium Antidote Is a perfect and painless cure for THE HABITUAL USE OF OPIUM ME HABITUAL USE or in any of its forms, whether as MORPHISE, LAUDANUM, ELIXER, or GUM OPIUM.

It Positively Produces a Permanent Cure.

It Positively Produces a Permanent Cure.

It is strange yet true, that as a rule it is the brightest leaf intellecta, the best members of society has ecome sdicted to this diseased appetite. A habit which makes them slaves, beclouds their minds, rains their dispositions, and gives them in their more natural moments a harter of saif as well as a feeling that everybody despises them—to such an extent this society has no charms. Suit thanks to the Giver of all good this, morbid, terrible habit, and degraded condition, as well as all of the distre and feeling for opiates in any form is soon removed by this remerkable antidote, entirely so, and the weakened body and mind are invigorated, gives renewed health until love and hope take the place of despondency and doubt. Hongil you may not be afflicted with the habit of using Bionardian, Ludhawus, or other forms of Orius, some friend may be, and you know it not, therefore let me sak you, in the name of suffering humanity to pass this on. By so doing you may respite reward of those who do good. DELLY NOT.
